Asymmetrical Liberation
Genesis Period. 2021 Oct #000.

Asymmetrical Liberation is a planet in the Synedrion system. It's a planet with a single moon, the surface covered with blue seas and green landmasses. Countless stars can be seen in the sky. This planet is full of people who are trapped by their own self-created prisons, their fears, their self-doubts, their own inability to see the world as it is, the way it could be, the way it should be.

Botto in conversation with GPT-3.
